

CSRD $\Rightarrow$ ESRS (European Sustainability standard) ISSB - global

unsolved problem:

- getting high quality traceable data
- low acc. in scope 3 monitoring

current comp.

- Watershed.
- IBM Envizi

company's data spread across

- Invoice PDF
- Excel sheet
- Email attachment
- ERP export
- Supplier declaration
- Utility bill
- Shipping document
- Purchase order

ESRS

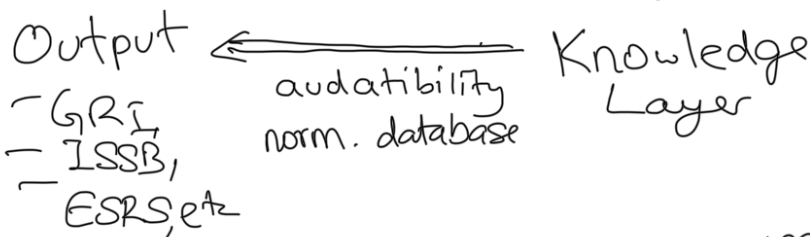

- Double materiality
- Reduced Gov. datapoints in 2026

PROBLEMS

- unstructured data
- diff. standards from suppliers
- Provenance auditability
- absolutely no hallucinations
- Multiple standards

Input $\Rightarrow$ AI Layer $\Rightarrow$ Deterministic Layer

Diagram

Can we turn arbitrary document into trusted evidence?

AI Layer:

- Document understanding
- entity extraction
- semantic normalization
- Evidence retrieval

Deterministic Layer (less use of AI):

- CO2 calculations
- Regulatory roles
- Emission factors
- validation.

Knowledge Layer:

- Different standards (ESRS, ISSB; GRI, (BAM))
